Experience

VarsityLink   Remote
Senior Software Engineer   *July 2022 – April 2023*
- Led development for a college sports recruiting social media application by writing RESTful APIs in Node.js with a Postgres database and a Redis cache
- Added real-time chat functionality to a mobile React Native application by integrating GetStream, a third-party chat SDK, significantly reducing latency, and enhancing user experience
- Developed an interface to input and display user profiles and dynamic statistics for various sports in a React Next.js web application

Automatic Data Processing Inc (ADP)   Parsippany, NJ
Senior Application Developer   *March 2022 – June 2022*
- Collaborated with stakeholders and led development for the redesign and enhancement of ADP's main payroll platform used by over 10,000 live clients
- Designed and implemented an event driven, distributed service to integrate a third-party insurance product with ADP's payroll process, saving users thousands of hours of manual work

Application Developer   *December 2019 – March 2022*
- Wrote RESTful APIs with Java and Spring Boot and led UI development for a flagship product providing global payroll processing for more than 100 countries
- Mentored junior team members, providing technical expertise, code reviews, and constructive feedback to foster their professional growth

Associate Application Developer   *November 2018 – December 2019*
- Debugged and fixed software issues, identifying root causes and implementing timely solutions
- Wrote clean, well-documented, unit-tested code using Typescript, React, Redux and Java, following established coding standards and best practices

Education

Fullstack Academy – Software Engineering Program   *May 2018 - August 2018*
Emory University – Bachelor of Arts in Economics   *August 2011 - May 2015*

Projects

Baike   https://baikerecipes.vercel.app | https://github.com/jormarcus/baike
- An AI powered app to find, organize, and share recipes
- Built with Typescript, React, Next.js 13, OpenAI, Prisma, Postgres, AWS Lambda, Cloudinary, Vercel

Skills

Languages: Javascript, Typescript, Java, SQL, HTML, CSS
Frameworks, Libraries, & Databases: React, React Native, Node.js, Next.js, Redux, Tailwind, Prisma, Sequelize, Postgres, Oracle, MongoDB, AWS S3/Lambda, Redis, Kafka, Docker, Spring Boot, Hibernate
